Pixel Art Description: The Finest Family from the Finest County is a family-themed game for children. In it, you can play and manage a family consisting of 4 characters - a father, a mother, a daughter and a son. In the course of the game, you must get along with each of your family members. You need to work together with them, invite them to a birthday party, and introduce them to the community. Though the game does have some story elements, it is pretty simple and kids will likely enjoy it to the fullest. The game is based on the concept of a mini-simulation wherein you get to manage your family members and perform actions for them. This lets you fully immerse yourself in the game, which is evident from the minute you start playing. Playing the game has a simple premise; you need to buy plants, water pumps and fruits and vegetables to feed your family members. When you feed them, they have the chance to progress in the game, and when you entertain them, they will continue to give you information. This lets you share your progress with other players. While the game lets you look after your family and get to decorate the house, it is not just about the fun. It has a mean goal; you must feed and educate your family members as well. Once the meal is done, the entire family will gather and build a full description of their personalities. This requires the player to press a random button to find out what the current family member says. In the process, you will find out what each member says, including their backgrounds and interests.
